

# Topper

## BANNER STANDS

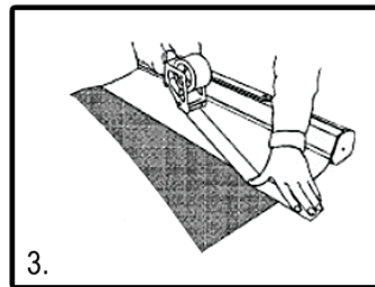

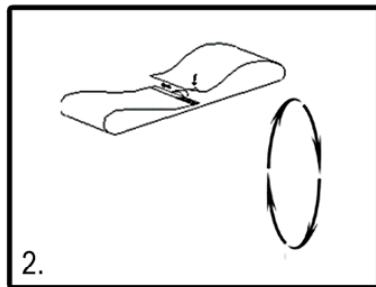

This is not a standing floor unit, therefore the graphic can vary in height. It comes with all the brackets and fittings to use as a floor unit, a ceiling unit, or a wall unit.

Before assembling the poles on the base, fix the graphics on the top roller.

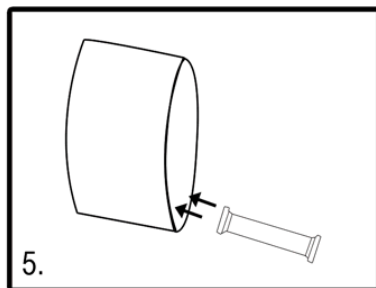

1. Feed the image through the top roller in the top casing.

2. Tape edges of the print together to create a looping print.

4. Attach the poles to the bottom base and the banner casing at the top.
5. The bottom weighted roller should be placed inside the graphic at the bottom of the graphic loop, (this piece of equipment is free-floating).
